

Egg Tangram (Cundy and Rolletts egg)

Egg tangram (Cundy and Rolletts egg) is puzzle consisting of a flat egg like shape divided into 12 pieces.

The objective of the puzzle is to rearrange the pieces to create numerous shapes- more popular once's are birds.

Try to find your own new shapes.

The process of piecing together the individual shapes supports the children's logical thinking, reasoning and visual problem solving skills.

These kind of tangram's originated in 1880's. The earliest known examples were produced by Richter, A German toy manufacture by using egg tangram of 9 -pieces.
